

Fabric Banners manufactured through Dye Sublimation are superior to standard vinyl banners. The Dye Sublimation process produces Fabric Banners with richer blacks and a wide range of vibrant colors that really pop off the material.

Fabric Banners can be produced up to 10 ft. wide without a seam. If you need Fabric Banners wider than 10 ft., no problem, we can produce the job in sections and sew them together using a “T-Shirt” seam. This seam is very small and hides well in large Fabric Banners..

SUGGESTED APPLICATIONS

Banners

Media Backdrops

Trade Show Displays

Event Backdrops

Photography Backdrops

Stage Curtains
